101ST CONGRESS *2d Session* | SENATE | REPORT 101-410

MILITARY CONSTRUCTION APPROPRIATION BILL, 1991

AUGUST 1 (legislative day, JULY 10), 1990.—Ordered to be printed

Mr. SASSER, from the Committee on Appropriations, submitted the following

REPORT

[To accompany H.R. 5313]

The Committee on Appropriations, to which was referred the bill (H.R. 5313) making appropriations for military construction for the Department of Defense for the fiscal year ending September 30, 1991, and for other purposes, reports the same to the Senate with various amendments, and presents herewith information relative to the changes made:

Amount of bill passed by House	$8,311,167,000
Amount of Senate bill under the House	331,876,000
Total of bill as reported to Senate	7,979,291,000
Amount of 1991 budget estimate	9,125,978,000
Amount of 1990 appropriations (adjusted)	8,250,575,000
The bill as reported to the Senate:	
Under the budget estimate, 1991	1,146,687,000
Under appropriations for fiscal year 1990	271,284,000

32-958

BACKGROUND

Purpose of the Bill

The Military Construction appropriation bill provides necessary funding for the planning, design, construction, alteration, and improvement of military facilities worldwide, both for Active and Reserve Forces. It also finances the construction, alteration, improvement, operation, and maintenance of all military family housing, including payments against past housing mortgage indebtedness. Certain types of community impact assistance are provided, as well as assistance to members of the military who face loss on the sale of private residences due to installation realignments. The bill is also the source for the U.S. share of NATO infrastructure construction costs. In addition, the bill provides funding to implement base closures and realignments authorized in Public Law 100–526.

Comparative Statement

The fiscal year 1991 budget requests appropriations totaling $9,125,978,000. The following table displays this request and compares it with the current fiscal year, the House amount, and the Committee recommendation:

SUMMARY OF THE BILL

The Committee recommends a total of $7,979,291,000 in new budget authority/appropriations for fiscal year 1991 programs under its jurisdiction. Significant comparisons are noted below:

Fiscal year 1991 budget request: Budget authority	$9,125,978,000
Committee recommendation for fiscal year 1991: Budget authority	7,979,291,000
Which is—	
Under new budget authority granted in fiscal year 1990 by	271,284,000
Under the budget request by	1,146,687,000
Under the House bill by	331,876,000

COMPLIANCE WITH SECTION 308 OF THE BUDGET CONTROL ACT

Section 308(a) of the Budget and Impoundment Control Act of 1974 (Public Law 93-344) requires that the Committee include in its report a comparison of its recommendations with levels contained in the first concurrent resolution. Appropriate data are reflected below:

BUDGETARY IMPACT OF BILL

PREPARED BY THE CONGRESSIONAL BUDGET OFFICE PURSUANT TO SEC. 308(a), PUBLIC LAW 93-344, AS AMENDED

[In millions of dollars]

	Budget authority		Outlays	
	Committee allocation	Amount of bill	Committee allocation	Amount of bill
Comparison of amounts in the bill with the Committee allocation to its subcommittees of amounts in the First Concurrent Resolution for 1991: Subcommittee on Military Construction	7,980	7,979	8,666	[1] 8,617
Projections of outlays associated with budget authority recommended in the bill:				
1991				[2] 3,050
1992				2,780
1993				1,252
1994				518
1995 and future year				379
Financial assistance to State and local governments for 1991 in the bill		40		40
	Direct loans		Loan guarantees	
Credit authority estimates, fiscal year 1991				

[1] Includes outlays from prior-year budget authority.
[2] Excludes outlays from prior-year budget authority.

COMMITTEE RECOMMENDATION

As previously noted, the Committee is recommending new fiscal year 1991 appropriations of $7,979,291,000. This is $1,146,687,000 under the budget request, $331,876,000 under House allowances, and $271,284,000 under appropriations for fiscal year 1990. The basis for this recommendation is contained in the following "Items of special interest," and under the sections pertaining to each appropriation account. Complete project detail is provided in the tables at the end of the report.

ITEMS OF SPECIAL INTEREST

CONFORMANCE WITH AUTHORIZATION BILL

The Committee strongly supports the authorization-appropriation process. The Committee has provided construction funds for projects which were included in the National Defense Authorization Act for fiscal year 1991 reported by the Armed Services Committee. As in previous years, the Committee has provided deficiency allowances to specific accounts to permit funding of projects expected to be authorized during consideration by the Senate of the national defense authorization bill.

BASIS FOR COMMITTEE RECOMMENDATION

The Committee has reviewed the fiscal year 1991 military construction appropriation in the context of the historic changes occurring in national security policy. The Committee has provided for only the highest priority military construction requirements. Many decisions regarding force and base structure are still to be made by the Department of Defense. Therefore, the Committee believes it premature to embark on larger military construction investments for the active services and defense agencies until more certainty exists in the program. The Committee has also rescinded funds from prior years which should not be spent because of unresolved force and base structure decisions. The amounts provided in the bill for military construction accounts represent, in real terms, the smallest new investment in facilities in more than a decade. The Committee believes a comprehensive budget agreement could necessitate additional reductions in the amounts provided for military construction and family housing in fiscal year 1991. Required adjustments will be made by the conferees on the House-Senate appropriation bill.

HISTORIC INTERNATIONAL CHANGES

Historic changes are sweeping the world. The cold war is being replaced by democratic revolution. The military threat from the Soviet Union is being dramatically changed. The Warsaw Pact no longer exists as a cohesive military alliance. These changes will substantially impact future U.S. national defense requirements. The size of the U.S. military will shrink and the mix of forces will be altered. U.S. military forces must be reconfigured to deal realistically with the growing realities of Third World instability, weapons proliferation, and international drug trafficking. At the same time, nuclear and conventional deterrence must be preserved. It is against this backdrop the Committee has reviewed the fiscal year 1991 budget request.

UNREALISTIC BUDGET REQUEST

The Administration's budget request included a 3-percent real increase for the military construction bill. Included in the request was an 83-percent increase over last year's appropriation for the base closure account. Funding for project construction at specified locations overseas was increased 22 percent over last year. Other major increases included a 22-percent increase for defense agencies and 12 percent for the Air Force. Despite large increases for overseas construction and construction by the active services, the budget request included a 71-percent reduction in the most cost-effective defense component, the Army and Air National Guard. The Committee believes the budget as submitted fails to comply with the urgent need to moderate the Federal budget deficit. Nor does the budget request reflect the historic changes occurring in world events and in U.S. national security policy. In short, the administration's military construction request is unrealistic because of the budget deficit and the current lack of certainty in planning the defense future.

MORATORIUM

Early in fiscal year 1990, the Secretary of Defense ordered a moratorium on all new military construction contracts. The Committee agrees with the purpose behind the Secretary's action. Many previously appropriated projects should not be obligated until final force and base structure decisions have been made. Proceeding with unnecessary project construction is not in the best interests of the American taxpayer. However, the Committee is concerned that the moratorium process adopted by the Department of Defense does not comply with the requirements of the Budget and Impoundment Act. The General Accounting Office informed Congress that the moratorium represents an illegal and unreported deferral of budget authority. The Budget Act requires the President to transmit an official deferral message. No deferral message was transmitted in connection with the Secretary's moratorium.

The Committee has agreed with the House provision disapproving the deferrals reported by the General Accounting Office. However, the Committee urges the administration to submit rescissions, as appropriate, for all projects no longer required. The Department should release other projects, particularly in the Guard and Reserve, which will not be impacted by base or force structure changes. Continuing to withhold those projects from obligation will only increase project costs due to inflation. The Department should also do a better job of coordinating proposed rescissions and deferrals with the military services prior to submission to Congress.

The Committee understands the construction moratorium is creating an inadvertent problem in the management of the construction work force. The construction work force is funded through the supervision, inspection, and administration fee collected as payments are made to contractors for each project. The short-term nature of the moratorium announcements made it imprudent to initiate drastic personnel reductions, beyond those currently planned, because the work force must be available at the end of the moratorium to execute the construction program. The repeated ex-

tensions and the delay in starting new work mean the DOD construction managers are faced with a shrinking income to pay for a work force required to execute the future program. Although it appears the construction agents can manage the costs for the balance of fiscal year 1990, there will be a substantial shortfall in available funds during fiscal year 1991. The Committee expects the Department to assist the DOD construction agents in resolving this funding problem through a reprogramming of funds from additional canceled or rescinded projects from all Services and defense agencies.

RESCISSION

The Committee approves the rescission of $286,419,000. The rescission package is in addition to the rescission of more than $250,000,000 contained in the supplemental appropriation previously enacted by Congress. The rescission recommended in this bill includes the following projects previously approved for construction overseas:

Military construction, Army 1986–90:	
Flight simulator building, Wiesbaden, Germany	$50,000
Hardstand, Hanau, Germany	1,850,000
Subtotal	1,900,000
Military construction, Army 1987–91:	
ADP center, Rheinberg, Germany	150,000
Communication center, Rheinberg, Germany	300,000
UPH with dining, Rheinberg, Germany	6,205,000
Range complex, Mannheim, Germany	2,450,000
Dining facility, Giessen, Germany	2,100,000
Tactical equipment shop, Hanau, Germany	3,700,000
Subtotal	14,905,000
Military construction, Army 1988–92:	
CDC, Rheinberg, Germany	1,050,000
Maintenance facility, phase I, Rheinberg, Germany	5,430,000
CDC, Hainerburg, Germany	2,250,000
Tactical shop, Vilseck, Germany	5,700,000
Operations building modernization, Stuttgart, Germany	5,400,000
Training exercise facility, Kaiserslautern, Germany	5,900,000
Range modernization, various locations, Germany	2,000,000
Hardstand, Hanau, Germany	1,300,000
Subtotal	29,030,000
Military construction, Army 1989–93:	
Barracks modernization, Argyroupolis, Greece	660,000
Barracks modernization, Perivolaki, Greece	660,000
IRETS ranges, Erlangen, Germany	2,850,000
Aircraft maintenance hangar, Budingen, Germany	7,100,000
Industrial operations facility, Rheinberg, Germany	6,600,000
Physical fitness center, Rheinberg, Germany	5,800,000
Tactical equipment shop, Wiesbaden, Germany	2,250,000
Chiid care center, Taegu, Korea	990,000
Subtotal	26,910,000
Military construction, Army 1990–94:	
Aircraft parking apron refueling facility, Hanau, Germany	8,300,000
Helicopter parking apron, Hanau, Germany	6,500,000
Class I warehouse addition/modernization, Hohenfels, Germany	3,550,000

Grand total	286,419,000

GUARD AND RESERVE

The Committee continues to support increased funding for the Guard and Reserve. The Committee believes the Guard and Reserve is the most cost-effective component of the Department of Defense. The Committee urges DOD to place more emphasis on the Guard and Reserve as the active services are built down. Therefore, the Committee has increased funding for Guard and Reserve accounts by $292,073,000.

BURDEN SHARING

With historic changes underway throughout the world, national security strategy and military force structure are in a state of change and reevaluation. A clear concept of European security, in particular, has yet to emerge. The Committee believes an unprecedented opportunity exists to, at last, shift a more equitable share of the common defense burden to our allies in Europe and the Far East. The Committee notes, for example, that the German Government is preparing to build family housing for Soviet troops redeployed from Eastern Europe to the U.S.S.R. In addition, South Korea has agreed to fund the relocation of United States forces headquartered in Seoul. The Committee urges the Department to moderate its construction program overseas and seek expanded contributions from our allies in support of forward deployed forces and military families. The Committee also reiterates that base rights and base access are tangible measures of burden sharing. However, the United States should not seek to maintain military bases in countries where we are not welcome. Nor should the Department of Defense urge the administration to accept unrealistic foreign aid and other financial demands from foreign governments which seek to gain leverage in exchange for a U.S. military presence on their soil.

BASE CLOSURES

The military construction bill provides $916,500,000 for the "Base realignment and closure" account, the same as the budget request. This account currently provides funding for the first round of base closures recommended by the Commission on Base Closure and Realignment in December 1989 and approved by the Congress. The Committee believes that the "Base closure" account should be utilized to pay for all costs associated with base closure and realignment including the cost of environmental cleanup. The House provided an additional amount for environmental restoration costs. The Committee directs the Department to include environmental restoration funds in future base closure account requests. The Committee understands that the Department is preparing to close

dozens of bases overseas, particularly in Germany. The Committee is concerned, however, that the Department is unable to identify for the Congress a list of bases being considered for closure. It is important that the military services build down smartly. Funds will not be available in the future for a large new construction program to support forces remaining overseas. Therefore, the Department should be very selective during the overseas base closure process. The best facilities should be maintained. In addition, the Committee is concerned that the Department may be willing to grant concessions to foreign governments, allowing foreign political considerations to influence U.S. overseas base closure actions. Politics has no role in base closure decisions here at home or abroad. Decisions must be based solely on military requirements. In addition, the Committee agrees with the House and directs the Secretary to provide the Committees with a report by January 15, 1991, on current efforts and plans for environmental restoration at closure sites overseas. The Committee reiterates that U.S. forces have been deployed abroad for the defense of our allies who have failed to provide sufficient funds for their own defense. Therefore, as a burden sharing initiative, the Committee directs the Department to seek host nation funding for all environmental cleanup costs at closed installations overseas.

OTHER ISSUES

European construction.—The Committee has deleted most projects requested for construction in Europe. The Committee believes it would be premature to proceed with construction at specified locations until the Department has finalized overseas base closure plans. The Committee has also eliminated $210,000,000 from the request for the "NATO infrastructure" account. The Committee directs the Department to provide a report by February 1, 1991, on reorienting the program to reflect changes occurring in Europe. At a minimum the Department should seek an expansion of the infrastructure program's criteria in a manner that would reduce U.S. unilateral funding requirements in future budgets.

Crotone AB, Italy.—The Committee has included a legislative provision denying the use of funds appropriated for the "NATO infrastructure" account and the Air Force for the construction of a new air base in Crotone, Italy, unless specifically authorized by Congress. It is the view of the Committee that financing for a new $800,000,000 foreign air base is simply not available when dozens of domestic bases are being closed. The Committee believes that a minimum cost bare base capable of supporting rotational aircraft would fulfill the U.S. commitment to NATO. The Committee believes an F-16 presence in southern Europe is important and urges the Department to direct the Air Force to develop lower cost alternatives. The Committee will consider alternatives recommended by the Department during conference committee with the House on the fiscal year 1991 appropriation bill.

Central America construction.—The Committee has denied funding for two projects in Honduras which are essentially security assistance to the host country. Security assistance appropriations are under the jurisdiction of the Foreign Operations Subcommittee.

The Committee directs the Department to submit a 5-year construction plan for the Southern Command's area of operations by February 1, 1991. The report should also include a discussion of the options and costs being considered for the relocation of the Southern Command from Panama. In addition, the report should include all construction-related activities in South America including construction associated with antidrug activities. As in previous years, the report should reflect construction expenditures from all DOD accounts.

Korea and Japan.—The Committee continues the general provision which prevents an increase in accompanied tours in Korea. In addition, the Committee agrees with the general provision approved by the House which prevents the use of appropriated funds to support the relocation of the U.S. 8th Army Headquarters. The Committee continues to insist that relocation costs must be the responsibility of the Government of South Korea. The Committee notes that an agreement has been reached with South Korea. The Committee has also eliminated all construction requested in Korea and Japan. The Department should seek host-nation funding for all construction requirements in those countries.

Construction in Zaire.—The Department is directed to provide to the Committee by December 15, 1990, a report on specific construction and engineering activities in Zaire to be funded from any Department source during fiscal year 1991. In addition, the Department is directed to prepare, in coordination with the Department of State, a detailed plan of construction activities proposed for Zaire in the next 5 years. The plan should be submitted to the Committee along with the report on fiscal year 1991 construction and engineering activities and should follow the format currently utilized in the annual Central America report.

Pentagon rehabilitation.—The Committee has deleted funds to start design of a $1,000,000,000 project to rehabilitate the Pentagon complex. The Committee is not unmindful of the age and the deterioration of the Pentagon Building. However, for a number of years the leadership of the Department did not seek to recoup a fair share of funds for repair and maintenance from the annual rent payments made to the General Services Administration. The Department should not be seeking funds of this magnitude from the military construction appropriation during a period of severe budget stringency when higher priority projects in the military services remain unfunded. Furthermore, the Committee reiterates the view that space needs at the Pentagon should be fulfilled by relocating functions and missions to other States and localities.

Reporting requirements.—For the past several years the Committee has reduced reporting requirements and changed various thresholds to reduce the amount of out-of-cycle actions which must be reviewed by the Committee. The Committee will continue to support a reduction of the reporting requirements placed on the Pentagon. Future reductions will be based on the Department demonstrating an ability to provide careful oversight on below threshold actions not required to be reported to the Congress. All reporting requirements, thresholds, et cetera, in effect for fiscal year 1990, shall remain in effect during fiscal year 1991, unless specifically changed by the fiscal year 1991 bill or report.

Planning and design.—The Committee has reduced the overall request for planning and design activities for the active services and defense agencies. The reductions reflect the Committee's view that future military construction activities must be moderated due to constraints on the budget.

Energy conservation.—As in previous years, the Committee continues to support energy conservation projects as an example of facility investments which soon pay for themselves. In fact, numerous reports from the House and Senate Armed Services Committees and Appropriations Committees to the Department clearly demonstrate the high level of interest that exists in energy savings projects by the Congress. Yet, despite this interest, the Department has not requested funds to invest in energy conservation and facility management systems. The Committee directs the Department to review its funding requests and to shift funds into procurement of these types of systems, where appropriate, to take advantage of the tremendous potential for savings that exist.

Program, project, and activity.—For purposes of the Balanced Budget and Emergency Deficit Control Act of 1985 (Public Law 99-177) as amended by the Balanced Budget and Emergency Deficit Control Reaffirmation Act of 1987 (Public Law 100-119), the term "Program, project, and activity" will continue to be defined as the appropriation account.

MILITARY CONSTRUCTION, ARMY

Fiscal year 1990	$727,883,000
Budget estimate, 1991	744,900,000
House allowance (including rescission)	630,322,000
Committee recommendation	698,167,000
Rescission	−116,745,000
Net	581,422,000

The Committee is recommending $581,422,000, including a rescission, for the Army for fiscal year 1991. This is a decrease of $193,478,000 from the budget request. (See State table at the end of the report for complete program recommendations.)

Red River, TX.—The Committee agrees with the House and denies the Department of Defense [DOD] request to rescind the $39,000,000 appropriated for the construction of the Central Distribution Center [CDC] project. The Committee further directs the Department of Defense to not use or transfer any of the $39,000,000 for any purpose not solely related to the construction of the CDC project at Red River Depot.

Approximately $20,000,000 has already been spent on the CDC project. It is the Committee's understanding that when all the expenses necessary to terminate the CDC are totaled, the cost to terminate the CDC could be as high as $40,000,000 or more. The Committee therefore directs the Department of the Army and the Secretary of Defense to complete an impartial study of the most effective sites in terms of cost, delivery, productivity, and readiness before the DLA makes final any decisions concerning supply consolidation. The Committee further directs that the study shall review and explore RRAD and the CDC's potential role in the Department of Defense's new supply consolidation network. The Committee expects DOD to heavily weigh cost factors, labor rates, transportation time and costs, delivery time and costs, capacity to expand on site and demonstrated efficiency of current operation in this study. The Committee directs the study shall be submitted to the Committee by January 2, 1991.

Chemical demilitarization, various locations.—Within the amounts provided for design, the Committee has included $6,000,000, the same as the House, for design of a demonstration plant utilizing the cryofracture technology. The Committee continues to believe this technology offers the potential for reducing the cost and increasing the efficiency of destroying chemical weapons.

Aberdeen Proving Ground, MD.—The Committee understands that Aberdeen Proving Ground relies on food storage structures that were constructed in 1942. Replacement parts for failing refrigeration equipment are difficult, if not impossible, to find and a substantial amount of food has been lost due to spoilage. The Committee directs the Department of Defense to commence design work on

a replacement cold/dry food storage facility and to include funding for its construction in the President's fiscal year 1992 budget.

Fort Ritchie, MD.—The Committee is aware that Fort Ritchie has a serious need for a new fire station that can provide adequate support to its important facilities. The Committee recognizes the urgency of this need and directs the Department of Defense to begin the design of a new fire station and to include its construction in the President's budget for fiscal year 1992.

Fort Huachuca, AZ.—Within the amounts provided for planning and design, the Committee has included sufficient funds to initiate design of a project to correct major defects at Libby Army Airfield. The Committee directs the Army to request construction funding in the fiscal year 1992 budget.

Fort Benjamin Harrison, IN.—Within the amounts provided for minor construction, the Department may provide $570,000 for an environmental warehouse at Fort Benjamin Harrison, IN. This project was included in the authorization bill.

Deficiency allowance.—The Committee has provided a deficiency allowance to provide funds for projects pending Senate authorization in the National Defense Authorization Act for Fiscal Year 1991.

Fort Wainwright, AK.-Within the amount provided for deficiency allowance, Army, the Committee recommends $8,300,000 be available for construction of one elementary school for military dependents at Fort Wainwright, AK. The increased personnel assigned to Fort Wainwright with the activation of the 6th Light Division and the establishment of the division headquarters have exceeded the capacity of existing school facilities. The construction of this school will permit the consolidation of elementary students from inadequate aging schools, and result in significant annual operation and maintenance savings.

Army Materials Technology Laboratory [AMTL]..—The Committee in its report on the fiscal year 1990 military construction appropriation bill included report language which directed the Army "to evaluate the feasibility of moving the Army Materials Technology Laboratory [AMTL], Watertown, MA, in total, to a materials science-oriented university setting." In addition, the Army was further directed "to review the economic and technical costs and benefits of such a move," and "to include input from all other agencies of the DOD with similar (research and development) requirements."

The Committee received a response from the Army, dated March 2, 1990, which stated that because of the Secretary of Defense initiative known as the defense management review and the Army chartered LAB 21 study it was not practical to evaluate the Committee proposal. The response further stated that action on these internal reviews would be complete by June 1990. Such action has been completed as this legislation moves through the Committee.

The Committee believes that its request from last year still has merit. The Committee believes that developments in the world, as mentioned earlier in this report, must be considered in every area of the defense budget. Therefore, the Committee recommends further review of its report language (S. Rept. 101-103, page 21). The Committee urges the Department of Defense to site the Army Ma-

terials Technology Laboratory in a university research park with an emphasis on materials sciences research. The Committee understands that discussions with Army agencies involved in this research support the concept which would keep the Army materials research program intact by locating it near a materials science university. The Committee directs the Department of Defense to report to the Committee not later than January 15, 1991, on this matter and urges that planning and design involved in this project be placed under contract as soon as possible.

Tripler Army Medical Center, HI.—The Committee directs that $515,000 be utilized from minor construction for the relocation and alteration of the headquarters administrative area. Additional funds have been added to the "Minor construction" account for this purpose.

Military Construction, Navy

Fiscal year 1990	$1,118,600,000
Budget estimate, 1991	1,113,300,000
House allowance (including rescission)	1,131,078,000
Committee recommendation	1,084,126,000
Rescission	−6,200,000
Net	1,077,926,000

The Committee is recommending $1,077,926,000, including a rescission, for Navy and Marine Corps military construction projects in fiscal year 1991. This amount is a decrease of $35,374,000 from the budget request. (See State table at the end of the report for complete program recommendations.)

Green Bank, WV.—Within the amounts provided for design, the Committee has added $1,000,000 for design of a radio telescope facility and for design of an alternate master clock facility at Green Bank, WV. The Navy is directed to include these projects in the construction request for fiscal year 1992.

St. Inigoes, MD.—The naval electronics systems engineering activity at St. Inigoes, MD, has been undergoing a major upgrade of its utilities systems. The final phase, sanitary sewer system improvements, would allow the facility to discontinue use of its failing septic systems which pose a significant environmental threat to the St. Mary's River and the Chesapeake Bay. The Committee directs the administration to include this project in the President's fiscal year 1992 budget.

Cherry Point, NC.—The Committee has deferred without prejudice $2,000,000 for construction of the U.S. Marine Corps Air Museum at Cherry Point, NC. The House included funding for this project; however, the Senate-reported National Defense Authorization Act for Fiscal Year 1991 did not provide authorization. The Committee will consider this project during conference with the House if it receives subsequent authorization.

32-958 O - 90 - 2

MILITARY CONSTRUCTION, AIR FORCE

Fiscal year 1990 (including rescission)	$1,171,296,000
Budget estimate, 1991	1,376,200,000
House allowance (including rescission)	924,056,000
Committee recommendation	892,184,000
Rescission	−25,390,000
Net	866,794,000

The Committee recommends $866,794,000, including a rescission, for the Air Force in fiscal year 1991. This is a decrease of $509,406,000 from the budget request. (See State table at the end of the report for complete program recommendations.)

Vandenberg AFB, CA.—The Committee agrees with the House and provides $19,200,000 for phase I of the Titan IV launch complex. The Air Force is still reviewing whether to build a new launch complex (SLC-7) or modify an existing complex (SLC-6). The Committee believes modification of SLC-6 will be the most cost-effective option.

F-117A wing relocation.—The Committee has deferred $11,000,000, without prejudice, to upgrade utility systems at Holloman AFB, NM, to support the proposed relocation of the F-117A aircraft from Tonopah, NV. The General Accounting Office is evaluating the various relocation options. If the GAO certifies it is more economical to relocate the wing, the Air Force may utilize $11,000,000 provided in this bill under the line item "F-117A facilities, site unspecified." The Committee has included a provision in the bill which restricts expenditures until certain conditions are met.

B-2 facilities.—The Committee has approved $55,000,000 for continuation of construction at Whiteman AFB, MO, the same as the House. This amount combined with $65,000,000 in fiscal year 1990 funds that have been deferred by the Secretary of Defense provide a total of $120,500,000 for the B-2 facility program at Whiteman in fiscal year 1991.

Various locations, Canada.—The Committee has deferred $18,300,000 for construction of forward operating locations in Canada. The Department should review the need for proceeding with these projects prior to submission of the fiscal year 1992 budget request.

Arnold Engineering Development Center, TN.—The Committee has deferred $43,000,000 from the amount requested by the Department of Defense for phase III of construction of the Large Rocket Test Facility (J-6). These funds cannot be executed during fiscal year 1991 due to program delays.

Indian Springs, NV.—The Committee believes that the A-76 cost comparison study to determine the desirability of contracting out of firefighting and security guard functions at Indian Springs Air Force Auxiliary Field is unnecessary. Therefore, the Committee directs no funds be made available for the completion of this study.

U.S. Air Force Academy, CO.—The Committee has deferred without prejudice the Consolidated Education and Training Facility at the Air Force Academy. The House included phase I funding of $15,000,000 for this project; the Senate-reported National Defense Authorization Act for Fiscal Year 1991 defers the project awaiting

decisions on the size of future classes at the Academy. The Committee will revisit this issue during conference with the House if the project receives authorization.

Rail garrison, various locations.—The Committee agrees with the authorization committee and recommends that the Air Force should continue design of facilities supporting the rail garrison Peacekeeper missile system at the first two scheduled deployment sites, F.E. Warren AFB, WY, and Barksdale AFB, LA. Completing design of these facilities will permit construction at these sites when the other elements of the program warrant deployment.

Military Construction, Defense Agencies

Fiscal year 1990 (including rescission)	$509,830,000
Budget estimate, 1991	787,500,000
House allowance (including rescission)	557,207,000
Committee recommendation	600,113,000
Rescission	−68,119,000
Net	531,994,000

The Committee recommends $531,994,000, including a rescission, for projects considered within the "Defense agencies" account. The amount recommended is a decrease of $255,506,000 from the budget request. (See State table at the end of the report for complete program recommendations.)

Columbus, OH, supply warehouse.—The Committee has not included funds for this project. Funds were previously appropriated by Congress in fiscal year 1990.

Classified projects.—The Committee has included a deficiency allowance to provide $8,100,000 for a classified operations complex and $2,000,000 for classified land acquisition activities. The Department should utilize emergency construction authority for these projects.

NATO Infrastructure

Fiscal year 1990	$402,789,000
Budget estimate, 1991	420,400,000
House allowance	250,000,000
Committee recommendation	210,400,000

The Committee recommendation of $210,400,000 for the "NATO infrastructure" account is $210,000,000 below the budget request. This appropriation provides the U.S. share of commonly funded NATO infrastructure in Europe. A discussion of this account is included at the beginning of this report under "Items of Special Interest—Other Issues—European construction and Crotone AB."

Military Construction, Guard and Reserve Components

Fiscal year 1990	$668,281,000
Budget estimate, 1991	280,378,000
House allowance	506,095,000
Committee recommendation	572,451,000

The Committee recommends $572,451,000 for military construction projects for the Guard and Reserve components. This amount

is $292,073,000 above the budget request and reflects the Committee's strong support for the most cost-effective component of the Department of Defense. A discussion of this account is included at the beginning of the report under "Items of Special Interest—Guard and Reserve." (See State table at the end of the report for complete program recommendations.)

Individual component recommendations are as follows:

Component	Budget request	Committee recommendation
Army National Guard	$66,678,000	$226,188,000
Air National Guard	66,500,000	154,830,000
Army Reserve	59,300,000	75,126,000
Naval Reserve	50,200,000	75,207,000
Air Force Reserve	37,700,000	41,100,000

Martinsburg, WV.—The Committee has added $1,500,000 to the Navy Reserve for design of facilities supporting a C–130 RESFORON at Martinsburg, WV. The Department is directed to include construction funds for these projects in the fiscal year 1992 request for the Navy Reserve.

Deficiency allowance.—The Committee has provided a deficiency allowance to provide funds for projects pending authorization in the National Defense Authorization Act for Fiscal Year 1991.

Iowa Army National Guard, various locations.—The Committee has included funding for authorized projects in Iowa; however, because the Committee action on this bill is being considered prior to Senate floor action on the National Defense Authorization Act for Fiscal Year 1991, several unauthorized projects of high priority are not listed in the table at the back of this report. The Committee supports the following projects at the levels noted:

Des Moines, STARC armory and vehicle storage building	$9,973,000
Council Bluffs, armory and organizational maintenance shop	2,643,000
Corning, armory	1,008,000
Oskaloosa, armory	1,306,000

The Committee expects that these projects will be fully authorized after Senate consideration of the National Defense Authorization Act for Fiscal Year 1991. Final action on these projects will take place during the conference committee meeting on this legislation.

Iowa Air National Guard, various locations.—The Committee has not included line-item funding for the following projects because Committee action on this bill is being considered prior to Senate floor action on the National Defense Authorization Act for Fiscal Year 1991:

Des Moines International Airport, upgrade aircraft maintenance hangar	$1,800,000
Sioux Gateway Airport, alter composite support facility	680,000

The Committee supports the projects mentioned above and expects that these high-priority projects will be fully authorized after Senate consideration of the National Defense Authorization Act for Fiscal Year 1991. Final action on these projects will take place during the conference committee meeting on this legislation.

Fort Des Moines, IA.—The Committee supports the Base Closure Commission recommendation to close Fort Des Moines, IA, except for the land and facilities being utilized by an Army Reserve Center and a Navy/Marine Corps Reserve Center. The Committee is concerned, however, that consideration has not been given to the fact that the Army Reserve Center has been using some old facilities in the area to be excessed and sold. It is the Committee's understanding that the plan calls for excessing all the land and facilities but would create a small compound separate from the reserve center. The Committee recommends that the reserve center compound be located in one single area. This would allow for the sale of the remaining property without having an old, rundown facility in the middle of the parcel. The Committee directs that the Department of Defense report to the Committee not later than January 15, 1991, on the plan for the disposal of Fort Des Moines and the facility requirements for the combined reserve centers.

Army aviation support facility, Camp Williams, West Jordan, UT.—The Committee has included funding for authorized projects in Utah; however, because the Committee action on this bill is being considered prior to Senate floor action on the National Defense Authorization Act for Fiscal Year 1991, several unauthorized projects of high priority are not listed in the table at the back of this report. The Committee supports the following projects at the levels noted:

Army aviation support facility, West Jordan, UT:	
Armory	$4,145,000
Aviation support facility	6,952,000
Organizational maintenance shop	799,000

The Committee expects that these projects will be fully authorized after Senate consideration of the National Defense Authorization Act for Fiscal Year 1991. Final action on these projects will take place during the conference committee meeting on this legislation.

Flagstaff, AZ, depot.—The Army and the National Guard Bureau are directed to work with the Forest Service to seek the transfer of the Army Navajo depot activity to the Arizona National Guard as permitted by the Commission on Realignment and Base Closure.

Grand Forks, ND.—The Army National Guard is directed to initiate design of an armory facility at Grand Forks, ND. The Committee also directs that construction funds for this project be included in the request for fiscal year 1992.

Fargo, ND.—The Committee directs the Secretary of the Air Force to proceed in relocation of the fuel facility [POL] located at the training facility of the North Dakota Air National Guard, Hector Field, Fargo, ND. The Secretary should request a reprogramming, if necessary, to accomplish the fuel farm relocation.

Various locations, TN.—The National Guard is directed to include in the fiscal year 1992 request those projects proposed for construction in Senate Report 101–130. The Committee has included $1,200,000 for design of an aircraft maintenance hanger at NAS Millington for the Navy Reserve. The Navy Reserve is directed to include this project in the construction request for fiscal year 1992.

Addicks Armory/organizational maintenance shop, Houston, TX.—The Committee has not included line-item funding for the fol-

lowing projects because Committee action on this bill is being considered prior to Senate floor action on the National Defense Authorization Act for Fiscal Year 1991:

Addicks (Houston, TX):	
Armory	$4,521,000
Organizational maintenance shop	872,000

The Committee expects that these projects will be fully authorized after Senate consideration of the National Defense Authorization Act for Fiscal Year 1991. Final action on these projects will take place during the conference committee meeting on this legislation.

Los Alamitos, CA.—Due to the leakage of the fuel storage and dispensing system, the Army National Guard may submit a reprogramming request to remove the old system and replace it.

Family Housing Overview

The Committee has provided $3,221,804,000 for family housing construction and operations and maintenance.

Contract cleaning.—The Committee has included a general provision approved by the House limiting contract cleaning of family housing quarters to $16,000,000. This is a reduction of $9,000,000 from fiscal year 1990. The Committee directs that contract cleaning shall be performed only at locations outside the continental United States where savings can be documented by reduced requirements for temporary lodging allowances.

General officers quarters.—The Committee agrees with House report language concerning reporting requirements for general and flag officer quarters and directs that no funds in this bill may be utilized to support general and flag officer housing construction which exceeds the statutory limitations specified in section 2826 of title 10 of the United States Code.

Family Housing, Army

Fiscal year 1990	$1,447,347,000
Budget estimate, 1991	1,554,200,000
House allowance (including rescission)	1,512,853,000
Committee recommendation	1,525,767,000
Debt reduction	−250,000
Rescission	−12,664,000
Net	1,512,853,000

The Committee recommends $1,512,853,000 for family housing, Army in fiscal year 1991 including a rescission. This is a decrease of $41,347,000 from the budget request. Specific details are included in the tables at the end of the report.

Fort Riley, KS—family housing.—The budget request considered by the Committee contained a request of $4,000,000 for Army family housing improvements at Fort Riley, KS. This funding was to be the second phase of a long-term project to complete whole house renovations on 435 units of Capehart housing constructed in 1959 and to which literally no improvements have been made since first occupied. The Committee has recommended the funding for this project; however, the Committee understands that an amend-

ment will be offered to the National Defense Authorization Act for Fiscal Year 1991 which would change the funding from improvements to new construction. The Committee supports this action. A recent economic analysis by the Army on this housing shows that whole house improvements would cost more than new construction. The Committee expects an amendment will be offered during Senate floor consideration of this legislation to make the changes necessary to appropriate funding for 250 new units of housing at Fort Riley. The Committee directs the Army to accomplish this project using the turnkey program and further directs the Army to include funding in the fiscal year 1992 Army family housing budget for an additional 185 units which would complete this housing project.

FAMILY HOUSING, NAVY

Fiscal year 1990	$798,321,000
Budget estimate, 1991	904,500,000
House allowance (including rescission)	865,064,000
Committee recommendation	829,708,000
Rescission	−11,037,000
Net	818,671,000

The Committee recommends $818,671,000, including a rescission, for family housing, Navy in fiscal year 1991. This amount is $85,828,000 below the budget request. Specific details are included in the tables at the end of the report.

Iceland.—None of the funds appropriated for family housng in Iceland may be obligated until the Department provides the Committee with a certification that the most cost effective option for providing new construction in that country has been approved by the host nation.

FAMILY HOUSING, AIR FORCE

Fiscal Year 1990	$870,004,000
Budget estimate, 1991	971,900,000
House allowance (including rescission)	910,578,000
Committee recommendation	910,430,000
Rescission	−45,964,000
Net	864,466,000

The Committee recommends $864,466,000, including a rescission, for family housing, Air Force in fiscal year 1991 which is $107,434,000 below the budget request. Specific details are included in the tables at the end of the report.

Construction improvements.—The Committee has provided the Air Force $130,000,000 for family housing improvements, a reduction of $43,612,000 from the budget request. The amount provided, however, is $43,000,000 more than the combined improvements allowance for the Army and Navy. The Air Force is directed to take the reduction from improvements planned at overseas bases.

Family Housing, Defense Agencies

Fiscal year 1990	$21,124,000
Budget estimate, 1991	21,100,000
House allowance (including rescission)	20,714,000
Committee recommendation	21,014,000
Rescission	−300,000
Net	20,714,000

The Committee recommends $20,714,000, including a rescission, for family housing, defense agencies in fiscal year 1991. This amount is $386,000 below the budget request. Specific details are included in the tables at the end of the report.

Homeowners Assistance Fund

Fiscal year 1990	$5,100,000
Budget estimate, 1991	5,100,000
House allowance	5,100,000
Committee recommendation	5,100,000

The Committee recommends $5,100,000 to be appropriated for the homeowners assistance fund, the same as the budget request.

Base Realignment and Closure Account

Fiscal year 1990	$500,000,000
Budget estimate, 1991	916,500,000
House allowance	998,100,000
Committee recommendation	916,500,000

The Committee recommends $916,500,000 for the "Base realignment and closure" account, the same as the budget request. A discussion of this account is included at the beginning of the report under "Items of Special Interest—Base closures."

GENERAL PROVISIONS

The Committee has made no changes to sections 101–129 as recommended by the House.

COMMITTEE RECOMMENDED PROVISIONS

The Committee has added one general provision to the House-passed bill as follows:

Section 130. The Committee has included this provision which is identical to language contained in the national defense authorization bill pending before the Senate. The text of the provision is as follows:

SEC. 130. (a) CONVEYANCE.—(1) Except as provided in paragraphs (2), (3), and (4), and subject to subsections (c) and (g), the Secretary of the Army shall convey to the University of Utah all right, title, and interest of the United States in and to the land comprising Fort Douglas, Utah, together with improvements thereon.

(2) The Secretary shall except from the land conveyed under paragraph (1) such land, not in excess of 64 acres, and improvements thereon as may be necessary for the Army to continue conducting Army Reserve activities at the Fort Douglas location.

(3) The Secretary shall also except from the land conveyed under paragraph (1) the land at Fort Douglas constituting the Fort Douglas Post Cemetery, consisting of approximately four acres.

(4) In connection with the land retained for Army Reserve activities and the land constituting the Army Post Cemetery, the Secretary shall reserve to the United States in the land conveyed such rights-of-way and other easements as may be necessary for ingress to and egress from the land retained.

(b) CONSIDERATION.—The conveyance under subsection (a) shall be made only on the condition that the State of Utah and the University of Utah waive any entitlements that have not been exercised on behalf of the University of Utah before the date of the enactment of this section and that may be due to the State of Utah or the University of Utah on behalf of the University of Utah under—

(A) section 3 of the Act entitled "An Act to establish the office of Surveyor-General of Utah, and to grant Land for School and University Purposes", approved February 21, 1855 (10 Stat. 611); and

(B) sections 8 and 12 of the Act entitled "An Act to enable the people of Utah to form a constitution and State government, and to be admitted into the Union

on equal footing with the original States", approved July 16, 1894 (28 Stat. 110).

(2) The waiver referred to in paragraph (1) shall be executed in such manner as the Secretary of the Army, after consultation with the Attorney General of the United States, determines necessary to effectively waive any unexercised entitlements under those laws.

(c) CONDITION.—(1) The conveyance provided for in subsection (a) may be made only on condition that—

(A) the State of Utah agree to maintain and operate, as provided in paragraph (2), the Army museum located on the land conveyed to the University of Utah pursuant to this section; and

(B) the University of Utah agree—

(i) to maintain and operate, as provided in paragraph (2), the Army chapel and other historical buildings located on the land referred to in subparagraph (A); and

(ii) to preserve and maintain, as provided in paragraph (2), the parade grounds that are a part of the land referred to in subparagraph (A).

(2) The Army museum, Army chapel, and other historical buildings referred to in paragraph (1) shall be maintained and operated, and the parade grounds referred to in that paragraph shall be preserved and maintained, in a manner consistent with Federal laws and regulations pertaining to the preservation of historical sites, buildings, and monuments, as specified by the Secretary of the Interior.

(d) REVERSIONARY RIGHT.—If the University of Utah uses the land conveyed pursuant to subsection (a) for other than educational or research purposes, all right, title, and interest in and to such land shall automatically revert to the United States and the United States shall have the right of immediate entry thereon.

(e) DEADLINE FOR CONVEYANCE.—The conveyance under subsection (a) shall be made not later than one year after the date of the enactment of this section.

(f) JOINT USE OF UTILITY SYSTEMS.—The Secretary may enter into an agreement with the University of Utah under which the Army and the University would—

(1) jointly use the existing utility systems located at Fort Douglas at the time of the conveyance provided for under subsection (a);

(2) equitably share the cost of maintaining, operating, and replacing (as necessary) the systems; and

(3) pay on a pro rata basis for the utilities consumed by each of the parties.

(g) ADDITIONAL TERMS AND CONDITIONS.—The Secretary may require such additional terms and conditions in connection with the conveyance provided for under subsection (a) as the Secretary considers necessary to protect the interests of the United States.

(h) ADDITIONAL EXCESS LAND.—In the event that any lands constituting Fort Douglas, Utah, that are not con-

veyed pursuant to subsection (a) are declared excess to the needs of the Army after the date of the conveyance provided for in that subsection, the Secretary shall convey such lands to the University of Utah. Any lands conveyed pursuant to this subsection shall be conveyed subject to a reversionary clause in favor of the United States as provided in subsection (d).

COMPLIANCE WITH PARAGRAPH 7, RULE XVI, OF THE STANDING RULES OF THE SENATE

Paragraph 7 of rule XVI requires that Committee reports on general appropriations bills identify each Committee amendment to the House bill "which proposes an item of appropriation which is not made to carry out the provisions of an existing law, a treaty stipulation, or an act or resolution previously passed by the Senate during that session."

All projects for which appropriations are specifically provided by the Committee are included in the Senate version of the authorization bill. The National Defense Authorization Act for Fiscal Year 1991 is pending before the Senate.

COMPLIANCE WITH PARAGRAPH 12, RULE XXVI OF THE STANDING RULES OF THE SENATE

Paragraph 12 of rule XXVI requires that Committee reports on a bill or joint resolution repealing or amending any statute or part of any statute include "(a) the text of the statute or part thereof which is proposed to be repealed; and (b) a comparative print of that part of the bill or joint resolution making the amendment and of the statute or part thereof proposed to be amended, showing by stricken-through type and italics, parallel columns, or other appropriate typographical devices the omissions and insertions which would be made by the bill or joint resolution if enacted in the form recommended by the committee."

In compliance with this rule, changes in existing law proposed to be made by the bill are shown as follows: existing law to be omitted is enclosed in black brackets; new matter is printed in italic; and existing law in which no change is proposed is shown in roman.

No change in existing statutes has been proposed.
